

NeuroSleep Technology Business Proposal

Project:

NeuroSleep Technology - AI Intelligent Sleep Healthcare System

1. Overview

NeuroSleep Technology develops next-generation intelligent sleep solutions combining artificial intelligence, smart sensing, ergonomic design, and personalized health management.

2. Core Products

AI Sleep Monitoring System:

- Sleep quality tracking
- Snoring and breathing analysis
- Personalized recommendations

Smart Cervical Support System:

- Adaptive support adjustment
- Pressure optimization
- Improved sleep comfort

AI Sleep Ecosystem App:

- Health data visualization
- Personal sleep management
- AI-driven recommendations

3. Market Opportunity

The global sleep health market is expanding rapidly as consumers seek better wellness solutions, smart devices, and personalized healthcare.

4. Business Model

Current Stage:

- Innovation concept development
- Partner identification
- Joint product development

Future:

- Hardware sales
- Software services

- Health ecosystem partnerships

5. Partnership Opportunities

Seeking cooperation with:

- Smart hardware manufacturers
- AI technology companies
- Healthcare organizations
- Investors
