

NeuroSleep Technology

AI Intelligent Sleep System

Transforming Sleep Into Smart Health

Executive Summary

The Problem

1 in 3 adults suffer from sleep disorders — costing the global economy
\$411B annually

The Opportunity

\$15.8B sleep tech market growing at **12.8% CAGR** through 2030

Our Solution

AI-powered smart pillow with real-time adaptive support and predictive health insights

Our Vision

Make personalized sleep optimization accessible to **500M+ people** globally

The Global Sleep Crisis

Scale of the Epidemic

35% of adults report insufficient sleep; **25%** have undiagnosed sleep apnea

Cascading Health Consequences

Linked to heart disease, diabetes, obesity, and accelerated cognitive decline

Broken Current Solutions

Sleep labs cost **\$2K–\$5K** per visit; CPAP machines face a **50% abandonment rate**

The Market Gap

No accessible, truly personalized sleep optimization exists for home use

Market Opportunity

Tailwinds Driving Growth

Smart Health Devices

47% CAGR in wearables + smart home health

Aging Population

65+ demographic grows **3.2% annually**; sleep issues peak at 70+

Preventive Healthcare Shift

Consumers spending **2.3× more** on wellness vs. treatment

The Problem We Solve

Unknown Root Causes

68% of people don't know why they sleep poorly — no accessible diagnostic exists at home

Silent Health Risk

30M+ undiagnosed sleep apnea cases linked to stroke, heart attack, and sudden death

Zero Personalization

One-size-fits-all pillows ignore individual biomechanics, spinal alignment, and sleep position

Fragmented Ecosystem

Sleep clinics are inaccessible; home monitoring solutions are disconnected and incomplete

The NeuroSleep Solution

AI Smart Pillow

Adaptive hardware with embedded biosensors — no wearables required

Real-Time Monitoring

Tracks sleep stages, heart rate, breathing patterns, and movement all night

Adaptive Support

Automatic height and firmness adjustment dynamically throughout the night

Predictive Alerts

Early warnings for sleep apnea, cardiac risk, and declining sleep quality trends

Technology Architecture

What Makes It Unique

Sensor Fusion

Five sensor modalities working in concert to achieve clinical-grade accuracy

On-Device AI

Real-time inference at the edge — no latency, full privacy preservation

Adaptive ML

Personalization models continuously retrain to individual sleep biomechanics

HIPAA Cloud

Enterprise-grade data security enabling healthcare system integrations

Product Features

Adaptive Height & Firmness

Automatic cervical alignment and real-time firmness modulation based on sleep position and pressure mapping

Thermal Management

Active temperature regulation maintains the optimal sleep microclimate throughout the night

Sleep Quality Score

Daily insights on sleep efficiency, deep sleep %, and REM quality with longitudinal trend tracking

Health Risk Alerts

Early detection of sleep apnea, cardiac arrhythmias, and emerging sleep disorders before clinical onset

Business Model

Revenue Streams

Hardware

Premium smart pillow at
\$599–\$799 with **60% gross margin**

Subscription

\$9.99/month for premium analytics, health coaching, and clinical insights

B2B Partnerships

White-label solutions for healthcare systems and insurance companies

Data Insights

Anonymized sleep health data licensing to pharma and medical device companies

Projected Year 3 revenue mix — recurring streams scale to majority by Year 5

Competitive Advantages

AI-Driven Personalization

Proprietary ML models adapt to individual biomechanics in real-time — no competitor matches this

Closed-Loop Integration

Seamless hardware + software system vs. fragmented, single-point competitor solutions

Clinical-Grade Accuracy

Sensor fusion matches polysomnography lab standards — validated for healthcare use

Health Ecosystem Play

Positioned for deep integration with Apple Health, Google Fit, and major EHR platforms

Global Market Strategy

Go-to-Market Channels

→ Direct E-Commerce

D2C flagship channel with full margin capture and direct customer data ownership

→ Premium Retail

Curated placement in premium lifestyle and health-focused retail environments

→ Healthcare Channels

Sleep clinic partnerships and physician referral programs for clinical credibility

→ B2B Enterprise

Corporate wellness and health insurance bulk partnerships for scaled adoption

📌 Target: **500M+ addressable users globally** by end of Phase 3 expansion
