

NeuroSleep Technology

Executive Summary — AI-Powered Sleep Ecosystem for the Global Health Market

Company Overview

What We Do

An AI-powered intelligent sleep ecosystem combining smart hardware, biosensors, and digital health into a single platform.

Our Mission

Transform sleep quality through personalized, science-backed optimization that adapts to each individual.

Who We Serve

Global consumers, healthcare providers, and enterprise wellness programs seeking measurable sleep outcomes.

The Problem

A Global Sleep Crisis

1 in 3 adults suffer from sleep disorders — poor sleep costs the global economy **\$411 billion annually** in lost productivity and healthcare burden.

Solutions That Fall Short

Traditional approaches — sleeping pills, generic wellness apps — lack personalization and real-time adaptation to individual biology.

A Missing Platform

No integrated solution currently connects hardware insights with actionable health intelligence in a single, unified ecosystem.

The Solution

AI Smart Pillow

Embedded biosensors track sleep stages, heart rate, breathing, and movement in real-time — passively and non-invasively.

Personalized Optimization

Machine learning algorithms adapt to individual sleep patterns and deliver nightly recommendations for measurable improvement.

Health Insights

Sleep data correlates with wellness metrics to identify risks for sleep apnea, insomnia, and chronic conditions before they escalate.

Technology Advantages

Why Our AI Wins

Deep learning models trained on **500K+ sleep cycles** deliver **95%+ accuracy** in sleep stage classification — far exceeding consumer-grade alternatives.

Our proprietary sensor fusion combines EEG, PPG, and accelerometer inputs into a single non-invasive biosensor array embedded directly in the pillow.

Adaptive hardware responds in real-time: smart temperature and vibration controls adjust automatically to guide users toward deeper, restorative sleep.

Proprietary AI Engine

500K+ sleep cycles trained; 95%+ stage accuracy

Advanced Biosensors

Non-invasive EEG, PPG, and accelerometer array

Mobile Platform

iOS/Android coaching, trend analysis, provider integration

Market Opportunity

\$15B

Sleep Tech Market

Global market growing at **12% CAGR** through 2030

500M+

Smart Home Devices

Sleep is the **fastest-growing category** in smart home integration

\$200B+

Digital Health

Sleep is critical to **preventive care** and chronic disease management

\$411B

Annual Economic Cost

Global productivity and healthcare losses from **poor sleep**

Business Model

1

Hardware Revenue

AI Smart Pillow priced at **\$399–\$599** with a **60% gross margin** — premium consumer positioning with strong unit economics.

2

Software Subscription

Premium tier at **\$9.99/month** unlocking advanced analytics, personalized sleep coaching, and healthcare provider access.

3

B2B Licensing

Enterprise wellness, health insurance, and healthcare provider licensing — scalable recurring revenue with institutional clients.

Partnership Opportunity

We are actively seeking aligned partners across four strategic categories to accelerate our global market entry.

Investors

Series A funding to scale manufacturing, expand our team, and accelerate market entry across key geographies.

Manufacturers

ODM partners for hardware production and supply chain optimization to meet growing global demand.

Healthcare Partners

Hospitals, clinics, and digital health platforms for clinical validation, research collaboration, and institutional distribution.

Global Distributors

Regional partners for market penetration across **APAC, EMEA, and the Americas** — priority regions for launch.
