

NeuroSleep Technology

Global Partnership Opportunity

Building the Future of AI-Powered Sleep Health

The Sleep Revolution

The world is facing a silent health crisis — and a monumental market opportunity. Sleep disorders affect over a billion people globally, yet remain dramatically undertreated. The convergence of AI, sensor technology, and digital health is creating a once-in-a-generation inflection point.

Our Vision

A New Standard of Care for Sleep Health Worldwide

We're building a global AI sleep health ecosystem that transforms how humanity understands, monitors, and optimizes sleep. By combining advanced sensor technology, machine learning, and clinical validation, NeuroSleep enables personalized sleep interventions at scale.

Creating a new standard of care for sleep health worldwide — at the intersection of technology, medicine, and human performance.

Why Partner With NeuroSleep

Four compelling forces make this the right moment to build with us.

1

Market Timing

Sleep tech adoption accelerating as healthcare systems globally prioritize preventive care and remote patient monitoring.

2

Proprietary Technology

Clinically validated AI algorithms delivering **94% diagnostic accuracy** — the gold standard in sleep health analysis.

3

Global Scalability

Platform-agnostic architecture enables rapid market expansion across regions, regulatory frameworks, and healthcare systems.

4

Revenue Potential

Multi-stream model spanning hardware, software, data insights, and clinical services — built for compounding growth.

The NeuroSleep Platform

A fully integrated hardware-software ecosystem engineered for clinical precision and consumer elegance.

Smart Pillow Hardware

Non-invasive sensors embedded in premium materials — clinically effective, beautifully designed, invisible to the user.

AI Sleep Analysis

Real-time sleep stage detection, sleep quality scoring, and predictive health insights powered by proprietary algorithms.

Sensor Suite

EEG, PPG, temperature, movement, and respiratory rate monitoring — a full physiological picture from a single device.

Digital Health App

Personalized recommendations, seamless integration with wearables, and secure connectivity to clinical health systems.

Partnership Models

NeuroSleep offers five distinct partnership frameworks — each designed to create deep, durable value for partners across the sleep health value chain.

Technology & Manufacturing Partnerships

TECHNOLOGY

Co-Build the Future

- **Joint R&D:** Co-develop next-generation sleep analysis algorithms and sensor technologies
- **AI Integration:** Embed NeuroSleep AI into partner platforms and devices
- **API Access:** White-label sleep data APIs for healthcare and wellness applications
- **Mutual IP:** Shared intellectual property with clear commercialization rights

MANUFACTURING

Scale at Speed

- **Licensed Production:** Manufacture NeuroSleep smart pillows and sensors under license
- **Supply Chain:** Preferred supplier relationships, volume discounts, and quality assurance
- **Customization:** Co-branded products tailored to regional markets and specifications
- **Scalability:** Capacity roadmap to 5M+ units annually by 2027

Healthcare & Distribution Partnerships

Sleep Clinics

Diagnostic tools for sleep apnea, insomnia, and circadian disorders — elevating clinical capability and patient throughput.

Hospital Integration

ICU monitoring and post-operative sleep recovery tracking integrated directly into clinical workflows.

Distribution Channels

B2B2C through healthcare providers, premium consumer electronics retail, and wellness platforms with regional exclusivity options.

Go-to-Market Support

Full marketing, training, and customer success resources provided to accelerate partner revenue from day one.

Investment Partnership

A Compelling Investment Thesis

NeuroSleep offers strategic investors equity participation in a high-growth medical technology company at the intersection of AI, digital health, and consumer hardware — with multiple clear value realization pathways.

Strategic Equity

Board representation and meaningful participation in governance and direction.

Growth Capital

Funding for R&D acceleration, global market expansion, and clinical validation studies.

Exit Pathways

Clear acquisition or IPO trajectory within 5–7 years as the market matures.

Value Creation

Projected 8–12x return on investment driven by market growth and platform monetization.

Growth Trajectory

NeuroSleep's revenue model scales rapidly across hardware sales, software subscriptions, and clinical data services — with aggressive but achievable unit milestones driven by global partnership rollouts.

From 50,000 units in 2025 to 5 million annually by 2030 — revenue scaling from \$8M to over \$800M through compounding partnership leverage across North America, Europe, and Asia-Pacific.

North America: First Mover Opportunity

PRIORITY MARKET · 2025 ENTRY

North America represents NeuroSleep's primary launch market — a **\$2.1 billion sleep tech ecosystem** growing at 18% annually, anchored by over 8,000 sleep clinics, major hospital networks, and a consumer wellness culture primed for premium health technology.

→ Market Entry: Q2 2025

Initial rollout across sleep clinics and direct-to-consumer digital channels.

→ FDA Clearance Pathway

510(k) pathway for diagnostic devices — regulatory strategy already in development.

→ 15% Market Penetration by 2028

Achievable through strategic distribution and healthcare system partnerships.
